Lodge Vault Desktop

The screenshot displays the Lodge Vault Desktop software interface. At the top, there is a menu bar (File, Edit, View, Tools, Help) and a toolbar with icons for Home, Finance, Configuration, and Documents. Below the toolbar, a navigation pane on the left shows a tree view with categories like Reservations, Occupancy Grid, and Reports. The main window is divided into two primary sections.

The upper section is a table titled "Reservations" with 14 columns: Res Name, Balance, Arrives, Departs, Status, Rg Units, Dep. Req., Dep. Am., Requests, and Notes. The table lists various reservations for different guests and dates, including details like room numbers and amounts.

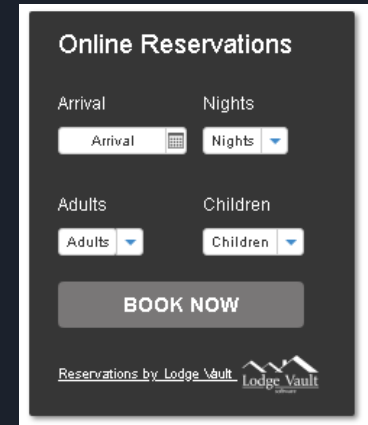

The lower section is an "Interactive Occupancy Grid" for the month of October 2018. The grid shows dates from Monday, 10/15/2018, to Sunday, 10/21/2018. The rows represent different rooms: Cabin 1a, Cabin 1b, Room 1, Room 2, Room 3, and Suite Y. Each cell in the grid contains a colored box representing a reservation, with details such as arrival and departure times, guest names, and room numbers. For example, Cabin 1a has a reservation for 11/17/2018 from 1:45 PM to 2:45 PM for 2 Adults and 1 Child.

Manages reservations, contacts, invoices, revenue, sales tax, and packages.

Interactive Occupancy Grid allows bookings by any duration (half day, weekly, monthly)
